

QuoteWin and DesignWin Release Notes

Version 10.0.0 to 10.0.14

April 21, 2018 - Version 10.0.14

- Resolved issue with the CM Selection import feature in Outsource which could fail to update the pricing table under certain conditions

March 31, 2018 - Version 10.0.13

- Resolved an issue with the "Set CM Target Price by % of Award price" function in the Outsource module, which may have not fully processed in certain conditions

March 10, 2018 - Version 10.0.12

- Converted CM Supplier exports in SupplyWin to XLSX format instead of CSV
- Added hover-over commodity descriptions to the commodity code in the pricing table and pricing table filter

January 20, 2018 - Version 10.0.11

- Corrected a Vol. Cost sorting issue in PN Listing reports which could affect the selection of prices
- Added the ability for users with full permissions in Cost Rollup to unlock raw costs
- Fixed issue related to automatically setting the Ref/Target price via the % or ABC feature
- Fixed issue related to creating new projects from within the Outsource module
- Improved Checklist reliability, it is now smoother to mark multiple tasks complete from the checklist screen

January 6, 2018 - Version 10.0.10

- Added multiple capabilities to the Outsource module:
- CM Suppliers can now be registered under multiple accounts with the same email

- Configurable fields can now be priced by CM Suppliers
- Refined RFQ Setting template options to display correctly in the Outsource module
- New feature added for setting CM Target Pricing on part part pricing screen in Outsource
- Fixed issue which could potentially cause incorrect or non-functioning manufacturer maps in step 3 of BOM import
- Enabled sorting capabilities within the File Exchange pop up window
- Added the ability to drag-and-drop files in project level attachments
- Added support for File Exchange to Internet Explorer
- Improved background processing function of BOM and Awards import function for speed and reliability

December 2, 2017 - Version 10.0.9

- Restored functionality for saving and using the Column Map templates when importing a BOM
- Added back the capability to "browse" for multiple files when adding part attachments as well as File Exchange attachments
- Fixed an issue with download capabilities in File Exchange feature for Outsource projects
- Corrected a sorting incompatibility in SupplyWin that affected CM suppliers quoting Outsource projects
- Added support for additional custom fields in Outsource
- Improved functionality of the manufacturer list in the Price Query tool to better allow user to pick manufacturer names

November 18, 2017 - Version 10.0.8

- Corrected issue with read-only permission capabilities in Contract GPD
- Improved BOM item master detail to automatically remove unsaved MPN lines that were manually added
- Improved BOM structure to immediately reflect assembly, part or revision changes without reloading screen
- Resolved sorting issue in SupplyWin web interface which could potentially display repeated rows
- Moving assemblies or parts manually in the BOM structure will now immediately show updated position, without a refresh

- Further enhanced the MPN section of the BOM Item Master Details page to operate reliably when sorting, or when additional columns are showing on screen. Scroll bars will now display when necessary
- Resolved issue which would overwrite the results of price query with different results
- Fixed issue which prevented matrix categories from being suggested when manually adding a matrix category in the AML section
- Resolved issue with some combo boxes so that typing will auto filter available choices in drop down
- Updated Project Statistics and Workflow reports to correctly display column header as Customer or Division based on the system configuration

November 4, 2017 - Version 10.0.7

- Resolved issue with Find Part functionality in large BOM trees
- Resolved intermittent issue in RFQ Dashboard where updating the Supplier Due Date could reset the RFQ Sent flag
- Resolved issue which did not display the update and cancel buttons when editing or copying projects in certain cases
- Resolved Find AML functionality in BOM where changing search view would display error
